1. The Amendment filed on 07/16/2007 has been entered. Claims 1-11 and 13-27 are pending in this Office action.

2. Claims 13-27 have been renumbered as claims 12-26, respectively.

### ***Response to Arguments***

3. Applicant's arguments, see Applicant's Remarks, filed on 07/16/2007, with respect to claims 1-2, 4, 6-8, 10-14 and 16 have been fully considered and are persuasive. The rejection of claims 1-2, 4, 6-8, 10-14 and 16 has been withdrawn.

4. Objection to the Drawings have been withdrawn after Applicant made all corrections.

5. Amendment to the Specifications has been reviewed and entered.

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

6. Regarding claim 1, claim is allowable over prior art of record after claim was amended to incorporate allowable features of claim 3 "counting a number of successive phase differences within an allowable detecting range and storing the number of

successive phase differences in a counter" and "providing a valid counting range according to an expected duration of the burst sequence" and "comparing the number in the counter with the valid counting range" and "locating the end of the burst sequence when the number in the counter is within the valid counting range".

7. Regarding claim 7, claim is allowable over prior art of record after claim was amended to incorporate allowable features of claim 9 "means for counting a number of successive phase differences within an allowable detecting range and storing the number of successive phase differences in a counter" "means for providing a valid counting range according to an expected duration of the burst sequence" and "means for comparing the number in the counter with the valid counting range" and "means for locating the end of the burst sequence when the number in the counter is within the valid counting range".

8. Regarding claim 11, claim is allowable over prior art of record after claim was amended to incorporate allowable features "estimating a burst frequency of the burst sequence by using a linear equation to calculate the burst frequency of the burst sequence from the upper threshold and the lower threshold once detecting the burst sequence, wherein the linear equation is set forth in the application claim".

9. Regarding claim 13, claim is allowable over prior art of record after claim was amended to incorporate allowable features of claim 15 "counting a number of

successive phase differences within an allowable detecting range and storing the number of successive phase differences in a counter and “providing a valid counting range according to an expected duration of the burst sequence” and “comparing the number in the counter with the valid counting range” and “locating the end of the burst sequence when the number in the counter is within the valid counting range”.

10. Regarding claim 18, claim is allowable over prior art of record after claim was amended to incorporate allowable features “estimating a burst frequency of the burst sequence by using a linear equation to calculate the burst frequency of the burst sequence from the upper threshold and the lower threshold once detecting the burst sequence, wherein the linear equation is set forth in the application claim”.

11. Regarding claim 21, claim is allowable over prior art of record after claim was amended to incorporate allowable features “estimating a burst frequency of the burst sequence by using a linear equation to calculate the burst frequency of the burst sequence from the upper threshold and the lower threshold once detecting the burst sequence, wherein the linear equation is averaging set forth in the application claim”.

12. Regarding claim 24, claim is allowable over prior art of record after claim was amended to incorporate allowable features “means for estimating a burst frequency of the burst sequence by using a linear equation to calculate the burst frequency of the burst sequence from the upper threshold and the lower threshold once detecting the

*burst sequence, wherein the linear equation is averaging set forth in the application claim*".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
